

net-m premium voice

**Are you looking for an invoicing method for your voice services?
We offer you a 5-digit premium voice short code!**

A brilliant possibility to make e.g. a **VOICE PORTAL** with various news topics, a **CHAT COMMUNITY** or a **PRE-LISTENING PLATFORM** billable. In addition, you get **A "PUNCHY" 5-DIGIT SHORT CODE**, which is accepted by the end-user. These short codes have already proven to be successful in the premium SMS market. There is **ONE NUMBER** you can reach via voice, SMS and MMS.

Premium voice is an attractive possibility to bring together **SMS AND VOICE**, which have been separated so far. From now on, you have the possibility to activate **5-DIGIT SHORT CODES**, which can be reached via SMS/MMS and Voice. You can activate your short code for Voice only, of course. So you benefit from another possibility to serve your clients.

The number can be allocated to a **PREMIUM PRICE** or invoiced via MT Billing with the dispatch of a SMS content. An imaginable possibility is the extension of your ring tone offer with a **PRE-LISTENING FUNCTION** including an order facility, a **CHAT COMMUNITY** or a **VOTING NUMBER**, which can be reached via SMS and/ or Voice.

Or what about a sport information-service with the latest news and interviews or a global economy or a stock exchange platform? You see, there are different possible applications. All you need is a marketable service and a voice platform. Certainly, you can use our voice platform as well! Look and see...just dial 2300 InfoTalk (€ 0,23/ min. T-Mobile).

More details? Send a short SMS with **VOICE** to **8 66 77** (normal SMS price). We will call you back.
